

## ILLINOIS ENVIRONMENTAL PROTECTION AGENCY

COOK COUNTY  
~~GENERATE~~ 3012  
MEMORANDUM

TO: Division File DATE: 4-11-84

FROM: B. Ekder ☒ Information only

SUBJECT: L03100000 Cook Co. Burnham/Calumet ☐ Response requested  
ILD980497713 Refining Co.

A preliminary assessment was completed for the above named facility. Very little information is available on this facility. They have not notified for any hazardous waste handling, nor have they received a State generator number nor applied for special waste disposal permits. A phone call to the Plant Manager indicated that the facility does not generate any wastes. Their business is in the blending of lubricating oils which are shipped out in bulk. They receive refined oil from their plant in Louisiana. The Plant Manager did mention that a small amount of refining is done at this facility, but not the same type of refining as done at a regular refinery. In addition to the oil they blend, a heavy residual fuel also results (no. 6 fuel oil) which they do not use, but sell to another oil processor who blends it with others and then sells the mixture for secondary fuels.

Due to the type of operations at this facility and the lack of generating any wastes, a ranking of "none" was given for its priority for inspection.
